Data Import Formats

The Move application loads a range of data file formats, most of which are listed in the table below. The table can also be found in the Move Application Software Help Pages (which are accessed from within Move of from the Move Launcher) where you can find links to further information on the file type and the associated Import Wizard (where appropriate). Midland Valley provides products which link directly to third party software applications: the Move Link for Petrel*, Move Link for OpenWorks and the Move Link for GST.

Name	Manufacturer	Product	Extension
2D SEG-Y	Various	Various	*.segy, *.sgy, *.seg
